2. **Information on Graduate Programs**

   **A. Dual-Title Doctor of Philosophy Program in Language Science and Communication Sciences and Disorders in the College of Health and Human Development: New Program**

      The proposal to offer a dual-title Ph.D. degree program in Language Science and Communication Sciences and Disorders in the College of Health and Human Development was approved by the Graduate Council at its May 12, 2010 meeting.

      The degree program will provide interdisciplinary training and collaboration, which may prove essential to the future of the field. Nationally, there is a critical shortage of Ph.D. faculty in Communication Sciences and Disorders. It has been argued that academic culture change is needed to build the research capacity necessary to allow Ph.D. graduates to become full participants in interdisciplinary research communities. The dual-title in Language Science is expected to provide the opportunity for Ph.D. students in Communication Science and Disorders to meet the new challenges in the field, as well as emerge as leaders in this interdisciplinary area.

      The Ph.D. degree requirements of Communication Sciences and Disorders include a minimum total of 57 post baccalaureate credits, exclusive of dissertation. Additionally, 21 credits of Language Science related coursework at the 500 level are required.

   **B. Dual-Title Doctor of Philosophy Program in Asian Studies and Political Science in the College of the Liberal Arts: New Program**

      The proposal to offer a dual-title Ph.D. degree program in Asian Studies and Political Science in the College of the Liberal Arts was approved by the Graduate Council at its April 21, 2010 meeting.
2. Information on Graduate Programs (Continued)

The rise of Asia as an economic, political, and cultural force over the last few decades has created a new impetus for the study of the history and culture of that geographic region, as well as the development of specialists in Asian languages and literature. The growing number of higher education positions emphasizing Asia are often for joint positions in Asian Studies and other disciplines, or for specialists in Asia inside the traditional disciplines. The dual-title Ph.D. in Asian Studies will strengthen the status of our students as candidates for these positions, as it will for those students who may seek the best jobs in their field. The creation of this dual-title degree program would acknowledge Penn State's strengths and encourage interdisciplinary work among graduate students and faculty. It would also raise Penn State's national research profile, attract and develop excellent graduate students, and help move towards the College of the Liberal Arts' stated goals of national prominence and national leadership in academic fields.

A minimum total of 60 postbaccalaureate credits are required, of which 45 credits exclusive of the dissertation, must be in political science. In addition, 15 credits of Asian-related coursework at the 400 or 500 level are required.

C. Dual-Title Doctor of Philosophy Program in Language Science and Spanish, Italian, and Portuguese in the College of the Liberal Arts: New Program

The proposal to offer a dual-title Ph.D. degree program in Language Science and Spanish, Italian, and Portuguese in the College of the Liberal Arts was approved by the Graduate Council at its April 21, 2010 meeting.

The dual-title degree in Spanish and Language Science will capture the interdisciplinary training and collaboration in a program of graduate training that will enable a new generation of language scientists to combine the tools associated with four disciplines: linguistics, psychology, cognitive neuroscience and speed-language pathology. Students with a dual-title degree in Spanish and Language Science will possess the disciplinary core associated with the study of Spanish. An immersion in a research-rich, cross-disciplinary environment will provide students with a highly competitive edge.

A minimum total of 60 credits are required, including 9 credits of core Spanish and Linguistics courses, 6 credits of proseminars in Language Science, 3 credits in Cognitive Science or Psycholinguistics, and 6 credits of research internships with two different faculty mentors.

D. Master of Public Health in Public Health in the College of Medicine: New Program

The proposal to offer a Master of Public Health in Public Health (MPH) in the College of Medicine was approved by the Graduate Council at its May 12, 2010 meeting.

Most experts agree that major advances over the next decade will arise from the broader development and application of population-based primary prevention, secondary prevention, and screening for early detection. Health services delivery systems are placing greater emphasis on health promotion and disease prevention. Public health practice is more and more focused on women's health, children's health, and substance abuse problems. Population-based interventions for the prevention management of chronic disease and sexually transmitted diseases, as well as the promotion of behavioral health change are also becoming priority services. The College of Medicine proposes to meet the challenges to come in public health services by offering the MPH to train the future health services workers. The College anticipates MPH graduates will be very marketable in academic, government, and health care delivery environments, and extremely influential on the future developments of these environments. In addition, experts in the field of population-based research also concur that an MPH degree for physicians is preferable to an MS degree in Public Health.

A minimum total of 47 credits are required and cover all five Council on Education for Public Health (CEPH) accreditation disciplines in order to earn an MPH degree, which is 5-credit hours more than the CEPH accreditation requirement for MPH programs.
